Occupational Health

OHN

Continuing Care

Occupational health nurse

NURSING

Front line nurse with ICP training

I found "The story of a Young child and his family" very eye opening, a presentation that all staff providing care should attend, it really brings it all together

The session from the Parent was very powerful. I think it would be good to use with other depts. e.g. EVS, Medicine, RT etc

Great job...

Did not attend the session on cleanliness strategy so cannot comment

Great Education Day!

Personal story was the best, should be shared within health authorities to front line staff

Excellent information presented in a clear and thorough manner by all presenters.

Great education opportunity.

Overall a good session. Informative. Would have liked to have asked more questions as some of the topics are difficult for the uninitiated - such as case definitions for long term care - however the format (webinar) was new for me!
